

Section 8: Library Service Policies

8J | Public Computers

The Library shall make computer stations available to the public and provide as many as meet current demand. The purpose of these stations is to provide high-speed Internet access to the community as one of the basic services the Library offers. In order to comply with the federally mandated provisions of the Children's Internet Protection Act all Internet browsers on public computers will be filtered.

The Library may also make mobile devices and mobile hotspots available for lending to Roselle cardholders, either onsite only or offsite. Library policies regarding use of equipment, networks, and lending would apply to the devices to the extent it is possible, depending on the capabilities of the device(s) in question. For devices that provide internet access offsite, like mobile hotspots, the Library is not liable or responsible for any internet browsing activity undertaken by borrowers of these devices.
